

CLIMATE CHANGE PREMIUM PERFORMANCE REVIEW REPORT

Thank you for submitting your 2015 CDP response. This performance Review Report shows how your company scored in comparison with other respondents and highlights areas for potential improvement.

OVERVIEW

Recognized by Globescan as the leading global system to measure, disclose, manage and share climate change and other vital environmental information, CDP provides an information platform for investors to protect their long-term investments and reduce risks arising from environmental externalities. It also helps organizations implement successful supplier engagement strategies, reduce supply chain emissions, control water impact and manage risk in a changing climate. CDP climate change – endorsed in 2015 by more than 822 institutional investors representing an excess of US\$95 trillion in assets – gives investors access to a global source of year-on-year information that supports long-term objective analysis.

Entering its fifth year of partnership with CDP, FirstCarbon Solutions (FCS) has scored more than 15,600 company disclosures as CDP's Global Scoring and Sustainability Outsourcing Partner.

"Transparency in environmental, social and corporate governance is becoming commonplace as more investment groups and customers require this information to properly manage risk while promoting good stewardship. We are proud to be helping organizations around the world measure, disclose and improve their climate change strategies and factor in water risk and opportunity to their analyses." - Robert Francisco, FCS president.

HOW DID YOU DO?

DISCLOSURE SCORE 95 **PERFORMANCE BAND** C

The Disclosure Score - Disclosure Score (0-100) measures the level of transparency your company has shared through its response.

The Performance Band - Performance Band (A, B, C, D OR E) measures how effectively your company is addressing climate risk. (Performance bands are only calculated for disclosure scores above 50)

<p>Top Area for Improvement Emissions Management</p>	<p>Top Area for improvement Emissions Management</p>
<p>High scoring companies ensure that they disclose:</p> <ul style="list-style-type: none"> Emissions reduction targets and initiatives Scopes 1, 2 and 3 emissions methodology, boundaries, data accuracy Calculated emissions and intensity figures; year-on-year changes in emissions and intensity figures 	<p>High scoring companies ensure that they demonstrate:</p> <ul style="list-style-type: none"> Set emissions reduction target(s) Demonstrated progress against emissions reduction targets Implemented emissions reduction initiatives Shown decreases in absolute emissions due to emissions reduction activities in all three scopes Shown decreases in emissions intensity figures due to emissions reduction activities

HOW TO IMPROVE YOUR VERIFICATION SCORE

In addition to the areas identified above, we recommend your company includes verification in next year’s submission. As part of the verification process, certified, independent verifiers identify any errors in your climate data and inefficiencies in the systems, models and controls in place for collecting and managing the data. To gain full points on verification, your company should verify 70% or more of reported Scope 1 and Scope 2 emissions and should ensure that you have not excluded any relevant sources from your GHG boundary. For more information on verification, contact CDP at verification@cdp.net.

NEXT STEPS

1. Improve Your Climate Change Reporting Strategies

CDP’s reporter services membership provides companies tailored support through a CDP account manager, as well as access to data, analytics software, and exclusive events that empower companies to benchmark and improve reporting and performance. Contact Reporter Services at reporterservices@cdp.net for details.

2. Assess and Reduce Climate Change Risk Presented to Your Company from Your Supply Chain

CDP’s supply chain program is a simple annual process that results in consistent information from suppliers on climate change and water related strategy action. This fee-based service produces positive results from suppliers, eliminates duplicate requests, reduces questionnaire fatigue, and provides a standardized platform comparison. More than 75 companies currently work with CDP on their corporate supply chain. Contact Sonya.Bhonsle@cdp.net to find out more.

3. Improve your CDP performance

The first step to improving your CDP and overall sustainability performance is to build a strong reporting foundation. With experience analyzing and providing CDP guidance on nearly 1,000 performance review calls, FCS is uniquely qualified to help your organization maximize your CDP performance and realize operational improvements in data collection, analysis and reporting processes. Not only does FCS have the technology solutions to support your business, we also offer data entry and management resources to provide a ‘fully automated’ and streamlined experience to help you get you out of spreadsheets and into saving resources.
