zes transities

NL

IABR introduceert zes thema's waarmee de transitie duidelijk wordt. Ze komen samen in dezelfde, beperkte ruimte van de delta van de Lage Landen en vormen de basis voor het werkprogramma tot 2020. In de zoektocht naar versnelling en opschaling van de transitie, kunnen overlappenden en koppelingen nieuwe handelingsstrategieën bieden.

- Ruimte voor biodiversiteit en water
- Zorgzame leefomgeving
- (Re)productieve stad
- Gezonde landbouw
- Hernieuwbaar energielandschap
- Een nieuw mobiliteitssysteem

six transitions

EN

IABR introduces six themes that make the transition clear. They come together in the same, limited space of the delta of the Low Countries and form the basis for the work program until 2020. In the search for acceleration and upscaling of the transition, overlaps and links can offer new strategies for action.

- Space for Biodiversity and Water
- Caring Living Environments
- (Re)productive City
- Healthy Agriculture
- Renewable Energy Landscape
- A New Mobility System

Climate Districts work on the transformation of residential areas where today's energy losses and tomorrow's profits are the greatest. On a regional scale, different methods and instruments are developed to support local authorities, property owners, and citizens in a collective energy production and renovation.

Klimaatwijken zetten in op de transformatie van de woonwijken waar vandaag de energieverliezen en morgen de winsten het grootst zijn. Op regionaal niveau worden de methodes en de instrumenten ontwikkeld om lokale overheden, eigenaren en burgers te ondersteunen in de collectieve energieproductie en -renovatie.

Quartiers de Climat s'investit dans la transformation de zones résidentielles générant les plus grandes pertes d'énergie aujourd'hui, mais pouvant également les plus grands bénéfices demain. À l'échelle régionale, sont développées et adaptées diverses méthodes et instruments pour soutenir les autorités locales, les propriétaires et les citoyens dans la production et la rénovation collective d'énergie durable.
